NEW SPEED is a robust and reliable cutting head, ideal for cutting grass and shrub up to 3.1" in diameter. It's available in 47" and 59" sizes. The structural characteristic allows to used/mount six different types of rotor (knives, hammers, multi-purpose knives Y, etc.), for working in different environments, from maintenance of the green to the forest use. The rotors can be quickly replaced by one operator. The double direction of the rotation of the rotor with an additional application of the 180° rotating wheel (optional), allow to work in both directions, optimizing working times.
