

REMOTE CONTROLLED TOOLS CARRIER

ROBOMD

New Remote Controlled Tools Carrier

RoboMIDI is a remote-controlled tools carrier machine able to work in the narrowest areas, on slopes up to 55° or where the access is very difficult.

Equipped with a **60 HP EPA Tier 4f diesel engine** and two double effect hydraulic functions it can carry various tools like a cutting head, a forestry head, a stump grinder, a bucket etc.

RoboMIDI, thanks to its power, performances, reliability and strength, is completely different from other remote-controlled machines.

STRENGTHS

RoboMD 60HP

STRENGTHS

Safety and Comfort

- Radio controlled machine
- Operator in safety zone
- Emergency button on the remote control
- Excellent maneuverability
- Easy to use and carry

Working on steep slopes

- Excellent grip in all directions up to 55°
- New tracks design with large bearing surface
- Special oil sump
- Low center of gravity

Multifunction

- Multiple tools available
- Road and river maintenance
- Green maintenance and forestry work
- Agriculture and industry service
- Winter road service

Productivity

- Engine 60 HP EPA Tier 4f
- Quick change of equipment
- Fast execution of work
- Reduced consumption
- Maneuverability on all surfaces

EMOTE CONTROLLED

RoboMIDI is Safety

RoboMIDI is a remote controlled machine, able to work in **complete safety** in **dangerous areas**, with slopes up to **55°** in any directions.

The exceptional stability of the machine is given by a low center of gravity, a special oil sump and rubber or steel tracks for an excellent grip.

The **safety of the operator** is one of our targets: the use of the remote control with up to **492 ft** range avoids several work risks to the operator such as noise, vibrations, exposure to exhaust materials, etc.

THE REMOTE CONTROL IS LIGHT, INTUITIVE, AND EASY TO MASTER

RoboMD 60HP

QUALITY COMPONENTS

RoboMIDI is built with an ultra-resistant steel to ensure a long duration; all the components are tested and certified to ensure the maximum reliability and safety.

- Engine tested by the producer with a remarkable reputation for the reliability.
- Remote-control technology developed by a team of specialized experts.
- Powerful and efficient powerful engine, ideal for steep slopes.
- Engine crankcase designed to ensure the lubrication, even on steep slopes.
- · Double roll bar integrated into the frame to ensure a total protection of the machine.
- Independent cooling system of the hydraulic system to optimize the performances.
- Flat bottom frame to protect the parts of the engine.
- Fully enclosed body panels to keep out grass and debris.
- Front lifter with quick attachment mounting system.

Born to satisfy the most difficult needs, **RoboMIDI** can easily be defined a remote-controlled grass cutting machine with power and performances comparable to a classic grass cutting arm for a tractor. These fundamental characteristics distinguish this machine from any other robot used for grass cutting: **power**, **reliability**, **strength** and **high efficiency**.

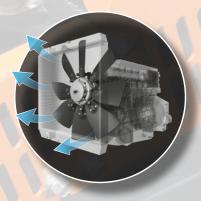

YANMAR ENGINE 60 HP

THE BEST COMPONENTS

RoboMIDI is equipped with the self-cleaning reversible fan FLEXXAIRE^{®,} to increase productivity and fuel saving.

FREXXAIRE® SELF-CLEANING REVERSIBLE FAI

Working on steep slopes up to 55°

The special design of the tracks and its tensioning system makes RoboMIDI a safe machine for working on slopes up to 55° in any directions: hilly and mountain areas, slopes, embankments, and in all those places where the adherence is very low and where a machine for high slopes is required.

Repolli

LOWERED CENTER OF GRAVITY

LOWERED CENTER OF GRAVITY

IDEAL FOR FORESTRY WORKS OR AREAS WITH DENSE VEGETATION

Tracks profile with the largest contact surface and smallest specific weight on the ground

OPTION A

OPTION B

SUPER RUBBER TRACKS

• 12" of width

• Wide supporting surface with consequent less weight per cm²

 Work on sloping areas up to 55° IDEAL TRACKS FOR ROCKY OR WET SURFACES

• 10" of width

TRACKS

STEEL

- Excellent adherence to the ground
- Work on sloping areas up to 55°

I THEUNCIO

The suitable tool for every work

RoboMIDI is a technologically advanced machine that responds to the current needs of safety and performances requested by the market.

Energreen, with its range of Robo machines, wants to change the traditional concept of grass cutting and other kinds of works, creating a remote-controlled machine, that can do operations of mowing where previously there was only the possibility to use hand brush cutters; this represents a new frontier of use, where the safety of the operators is put first.

RoboMIDI is certainly faster than the traditional ways of mowing; it allows to optimize the work in the most different working environments.

STANDARD

Quick Attachment

FETY

RoboMIDI is a remote-controlled tools carrier machine equipped with a dedicated lifter which allows a quick-change system, making the work easier and multifunction.

Strong radiator protection

RoboMIDI can be equipped with a rear steel protection for the radiator (optional). It is a solid structure made up of metal tubes and plates designed to limit damages in case of collision. The structure is handy and easy to open, making everyday maintenance much easier, thanks also to the possibility of lifting it and have an easy access to the radiator.
